

# LBD & MMB SERIES

## Stand alone brushless drive

LBD Drive is a stand alone brushless drive to install on cabiret for synchronous AC motors extremely compact, reliable and high-performance.

The wide range with 230 Vac single phase solutions and 400 three-phase 400 Vac solutions in combination with the brushless motors of the MMB series makes it suitable for all applications on machines with high kinematic performance. The CANopen and EtherCAT interface makes it particularly suitable for use with FCT controllers. Also available interfacing analog inputs and stepper motor simulation. The system is equipped with the standard safety function STO at SIL2 level.

LBD Drive è il tradizionale azionamento brushless stand alone da quadro per motori AC sincroni estremamente compatto, affidabile e di grandi prestazioni.

L'ampia gamma con soluzioni sia a 230 Vac monofase che 400 Vac trifase in abbinamento ai motori della serie MMB lo rende adatto a tutte le applicazioni su macchine con alte prestazioni cinematiche. L'interfaccia CANOpen e Ethercat lo rende particolarmente adatto all'uso con i controllori FCT.

Disponibile anche l'interfacciamento analog input e Stepper motor simulation.

Il sistema è dotato delle funzioni standard di sicurezza STO SIL2.

## • BRUSHLESS DRIVE 230 VAC

with CANopen interface dedicated to the FCT series motion controller

### Power supply

230Vac single phase

### Logic supply

24Vdc

### Rated current

230Vac: 5,5A - 8,5A

### Peak current

230Vac: 11/17 A

### Interface

CANopen DS402 (2 RJ45 connectors), etherCAT

± 10V, Pulse/direction

### Feedback

Resolver, TTL incremental encoder, TTL incremental encoder+HES, SinCos, Hiperface absolute encoder single and multturn

### Encoder emulation

Incremental TTL (differential output)

### 2 Analog inputs

12bits +/-10V

### 1 Analog output

8 bits +/- 2,5V

### 5 Digital inputs

24Vdc optoisolated: general purpose or configurable as Capture, Index, Limit switch +/-, Enable, STEP/DIR

### 3 Digital outputs

Parametralbe 24Vdc max 300mA with dedicated terminal connection for motor brake control (external power device required)

### Braking resistor

30W included. External connections available

### STO function

2 channels, SIL2 compliant

### Motor thermal sensor

PTC/NTC

### EMC filter

Choke integrated

**Certifications:** CE

## • OVERALL DIMENSIONS

Type	LBD23	
Peak current	11	17
Standard dimensions (mm)	H148XW70XD143	
Weight (Kg)	1,5

## • BRUSHLESS DRIVE 400 VAC

with CANopen interface dedicated to the FCT series motion controller

### Power supply

400Vac three phase

### Logic supply

24Vdc

### Rated current

400Vac: 4/10/22,5/35 A

### Peak current

400Vac: 8/20/45/100 A

### Interface

CANopen DS402 (2 RJ45 connectors), etherCAT

± 10V, Pulse/direction

### Feedback

Resolver, TTL incremental encoder, TTL incremental encoder+HES,  
SinCos, Hiperface absolute encoder single and multiturn

### Encoder emulation

Incremental TTL (differential output)

### 2 Analog inputs

12bits +/-10V

### 1 Analog output

8 bits +/- 2,5V

### 5 Digital inputs

24Vdc optoisolated: general purpose or configurable as  
Capture, Index, Limit switch +/-, Enable, STEP/DIR

### 3 Digital outputs

Parametrable 24Vdc max 300mA with dedicated terminal  
connection for motor brake control (external power device required)

### Braking resistor

35W included. External connections available

### STO function

2 channels, SIL2 compliant

### Motor thermal sensor

PTC/NTC

### EMC filter

Choke integrated

**Certifications:** CE

### • GEM DRIVE STUDIO FOR LBD DRIVE

Gem Drive Studio (GDS) is the development environment for configuration, parameterization and tuning of the LBD drives using RS232 or a centralized connection via fieldbus. The software can be configured into different levels depending on the experience of the user and provides many tools for the configuration, tuning and monitoring of the drive.

Gem Drive Studio (GDS) è l'ambiente di sviluppo per la configurazione, parametrizzazione e taratura degli azionamenti LBD utilizzando la seriale RS232 o un collegamento centralizzato tramite bus di campo.

Il software può essere configurato in diversi livelli a seconda dell'esperienza dell'utilizzatore e mette a disposizione molti strumenti per la configurazione, la taratura e il monitor dell'azionamento.

### • CONTROL FEATURES

PWM: 8KHz

Digital current loop: 62,5µs

Digital speed loop: 500µs

Position loop: 500µs

Auto-phasing: motor phase and resolver

Auto-tuning: 3 bands, 2 filters

Motor cogging torque compensation
